CAREER OBJECTIVE: Obtain a challenging and engaging Software Development job that contributes to a growing and dynamic technology company in the fields of computer science and software development.

EDUCATION

California Baptist University **May, 2022**
Bachelor of Science, Computer Science **GPA: 3.94** *Riverside, CA*

Minor: Mathematics

- Provost's List Honors
- Alpha Chi Honors Society

University of Texas, Austin **Expected Dec, 2027**
Masters of Artificial Intelligence **GPA: 4.0** *Austin, TX*

SKILLS

Computer Programming: Experience with Java, Javascript, C#, C++, Python, HTML, Jenkins, Cloudbees, etc

Computer Science: Data Structures, Algorithms, Agile Development, ML, DL, AI Model Architecture

EXPERIENCE

Keysight Technologies **April, 2022 - Current**
R&D Software Engineer *Santa Rosa, CA*

- Implement company wide interoperability software standards across projects and teams
- Communicate with worldwide developers and managers to plan development of standards.
- Develop and release a cross platform mobile app for Keysight asset management using Angular, Ionic, Capacitor, and proprietary internal Keysight standard frameworks.

Keysight Technologies **June, 2021 - April, 2022**
Intern Tech II *Santa Rosa, CA*

- Enhance Matlab graphical user interface for calibration experts and measurement engineers.
- Make accurate and meaningful measurements with simulation software and measurement tools.

Globe Biomedical **June, 2021**
Flutter Front End Developer *Riverside, CA*

- Translate verbal needs into workable virtual web app designs for clients.
- Develop the groundwork for a doctor's portal web app.

Keysight Technologies **June, 2020 - November, 2020**
Software R&D Intern *Santa Rosa, CA*

- Configure and build an automated CI pipeline for the SEP team using Jenkins, Visual Studio, JFrog Artifactory, Hashicorp Vault, Bitbucket, and other tools.
- Collaborate with other team members to set up server based remote builds that automatically push binaries to Artifactory.

PROJECTS

Leadership Experience: Senior Capstone Lead **September, 2021 - May, 2022**

- Lead a group of Upper-Classmen engineering students in an open-source adaptive testing project for a California Baptist University client.

Building Personal Computer **June - July, 2020**

- Learn about computers and PC structure in order to build a workstation from scratch
